TECH STACK

Frontend: React, Next.js (App Router), TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

State Management & Data Fetching: Zustand, TanStack Query, Axios

Backend: Node.js, Express.js, MongoDB, Mongoose

Authentication & Security: JWT, bcrypt, HTTP-only cookies

Forms & Validation: React Hook Form, Yup

Tools & Deployment: Git, GitHub, Postman, Vite, Vercel, Render, MongoDB Atlas

SOFT SKILLS

- Problem solving
- Team leadership
- Communication and collaboration
- Analytical thinking
- Adaptability

LANGUAGES

- Ukrainian - Native
- English - A1 (actively improving)

Oleksandr Sulyma

Fullstack Developer

SUMMARY

Fullstack Developer focused on building web applications with React, Next.js, Node.js, and MongoDB. Experienced in developing complete products with authentication, REST APIs, CRUD functionality, state management, and responsive UI. Strong background in team leadership, communication, and problem solving.

PROJECTS

Delivery App — Fullstack Food Delivery Platform | 2026

[GitHub Repo](#) | [Live Demo](#)

Fullstack e-commerce application for food delivery with cart management, checkout flow, and promo code system.

Key achievements:

- Developed complete user flow from product catalog to checkout and order history
- Implemented persistent cart state using Zustand and localStorage
- Built REST API with authentication, validation, and protected routes
- Developed promo code system with expiration logic and single-use validation

NoteHub — Fullstack Notes Management Application | 2026

[GitHub Repo \(FE\)](#) | [GitHub Repo \(BE\)](#) | [Live Demo](#)

Fullstack notes application with authentication, CRUD operations, search, and protected routes.

Key achievements:

- Implemented authentication flow using JWT, refresh tokens, and HTTP-only cookies
- Built Notes API with CRUD operations, filtering, and pagination
- Integrated Cloudinary for secure image upload and storage
- Implemented UI caching and synchronization using TanStack Query
- Implemented client-side draft persistence using Zustand and localStorage

LearnLingo — Language Learning Platform | 2026

[GitHub Repo](#) | [Live Demo](#)

React application for tutor discovery and lesson booking.

Key achievements:

- Implemented Firebase authentication flow (login, registration, logout)
- Integrated Firebase Realtime Database for tutor data management
- Implemented tutor filtering by language, level, and hourly rate
- Implemented protected routes and favorites functionality for authenticated users
- Developed responsive UI using Tailwind CSS

WORK EXPERIENCE

Sales Representative | LLC "LITIZ" | Oct 2024 – Present

- Client communication and negotiation
- Sales process support and development

Military Service | Management Positions | Mar 2014 – Sep 2024

- Led teams and coordinated operational processes
- Managed task delegation and execution control
- Mentored and trained personnel in high-responsibility environments

EDUCATION & COURSES

Kyiv Military Institute of Management and Communications

Specialist Degree in Electronic Engineering (Automated Control Systems) | 1990–1995

GoIT IT School | Fullstack Developer Program | 2025 – 2026
